

# The Old Cattle Rancher's Ranch

February

**No one knows his name. You yell, "HEY, old cattle rancher."**

Agriculture, Soil, Equipment, Cattle, and whatever he wants.

[www.feantm.com](http://www.feantm.com) magazine

First - on January 13<sup>th</sup> this guy did a complete 360. He was shaken up but no damage. As mentioned in December, it doesn't pay to speed down this country road - so let me reiterate it for January - Don't speed down this country road!

Marsha stays very clear of the front of her house between 6AM and 8AM - Just watches the camera while having her coffee as cars speed by. (IF anyone is hurt it will never be posted - this is to show how great the car manufacturers are with safety features - seat belts, airbags, etc.) Video

Oh look? Why is he going sideways past the house?

A start of a roll over? Nope he did a 360 - lucky!

Now he is facing the house!

Now he is almost all the way safe.

And he just drove along the gravel without hitting the fence! GO DRIVER - GO CAR - either he did great control and steering or was really lucky!
